

TIMOTHY GRAB & GO®

Premium Sun-Cured Timothy Grass Forage

COMPRESSED BALE

Premium Timothy Grab & Go Compressed Bales are formed by allowing Standlee Premium Western Forage to grow to the proper stage of maturity, cutting the plants, allowing them to sun-cure (dry) to an acceptable moisture level and baling the forage at the optimal time. Standlee Premium Western Forage creates Grab & Go compressed bales of forage from a large 4'x4'x8' bale that is put through a press, sliced horizontally, pushed onto a scale, weighed, compressed, banded and then shrink-wrapped. Timothy Grass forage is highly palatable, is low to moderate in protein and high in digestible fiber. Forages are non-perishable and can last for long periods of time if stored properly. Always store forages in a cool, dry and wellventilated area. As long as the product is properly stored, forages can last for well over a year or more. Available in approximately 50 lbs. bales.

Patent Pending

Item #: 1200-20021-0-0

FEEDING INSTRUCTIONS

On average, most horses comfortably consume 2% of their body weight in dry forage per day. This equates to 20 lbs of dry forage per day for a 1000 lb horse. Standlee recommends that you weigh the amount of forage provided to each horse to ensure you are feeding the proper amount. This is especially important with baled and compressed forage since similar volumes of forage (a flake for example) vary in weight. Standlee also recommends cutting the bands on compressed bales and allowing the bale to expand overnight to avoid overfeeding. Feed Standlee Premium Western Baled or Standlee Premium Western Compressed Forage at a minimum rate of 1.5% of body weight. Gradually increase or decrease the amount of forage to maintain desired body condition. Never feed moldy or insect infested forage to horses. Always provide free-access to fresh, clean water.

RECOMMENDED FOR

Horse

Livestock

Llama

Goat

Sheep

Other: bison, camels, alpacas, deer and elk

GUARANTEED ANALYSIS

Crude Protein.....	Min 8%
Crude Fat.....	Min 1.5%
Crude Fiber	Max 35%
Ash.....	Max 12%

INGREDIENTS

Naturally Sun-Cured Premium
Western Timothy Grass Forage

BENEFITS

- Moderate to low in sugar
- Natural forage length mimics grazing
- Slow intake, stimulates chewing and minimizes digestive upset
