DRYSHOD®
WATERPROOF FOOTWEAR

Dryshod® is the world’s most wearable rubber boot!

Dryshod Waterproof Footwear

is a line of hard-working, durable, super-comfortable 100% waterproof footwear.

Our story begins...

Dryshod was developed to bring great waterproof footwear to hardworking farmers, hunters, gardeners and outdoor enthusiasts everywhere. The Dryshod team’s complete focus and commitment is to create world-class footwear that will keep feet warm, dry and protected in the harshest weather and messiest conditions. With a brand name that literally means “dry shoes”, it is only natural that the mission of Dryshod International is to become the leader in waterproof-footwear products worldwide. The first step to achieving that goal was to launch the brand with a team of the most experienced and proven professionals the waterproof-footwear category has ever known.

The team starts with former Muck® Boot Company founder and owner, Jim Donohue. Jim created the first bootie-style boot in the basement of his home in Danbury, CT back in 1998. Rather than sell his boots through traditional footwear stores, Jim worked with a network of rural distributors to specialize in selling bootie-style neoprene and rubber products directly into the farm and ranch retail sectors nationwide. Initial product styles were a hit with rural customers and the line quickly expanded to styles for lawn and garden, hunting, pet care and specialty work boots. Distribution of the brand expanded into Canada, UK and EU markets before Jim sold the Muck Boot Company to a competitor in 2003. With the new Dryshod brand and product line, Jim is returning to his roots by creating super-durable waterproof footwear products for rural markets and partnering with the key sales and distribution groups that established special prominence to bootie-style footwear over the past twenty years. Total focus of the new Dryshod team is to create world-class footwear that will keep your feet warm, dry and protected in the harshest wet and cold conditions.

Dryshod Footwear Anatomy

premium features

Dryshod footwear products go “Beyond Waterproof” by providing weather-proof technologies to keep your feet warm, dry and protected in the harshest weather and messiest working conditions. The secret to Dryshod boots effectiveness is our exclusive self-insulating, waterproof DENSOPRENE® foam bootie construction and HYDROKOTE® water repellent textile treatment.

100% WATERPROOF - Designed and built to be 100% waterproof from top to bottom

5 mm DENSOPRENE® FOAM INSULATED BOOTIE - Keeps out the cold & wet - keeps in the warm & dry
DENSOPRENE foam is a super dense neoprene material that keeps the cold/wet out and the warm/dry in. This waterproof and self-insulating foam is naturally lightweight, buoyant and very comfortable - your foot and lower leg stay warm and protected in cold and wet conditions. In fact, they are constructed with the same material as deep-water dry suits. Dryshod materials exceed the long-term effectiveness of waterproof membrane materials and provide greater insulating properties per volume than fine-layered substrates. ***Standard on all Dryshod except Cool-Clad™ models.***

HYDROKOTE® WATER-REPELLENT - No more soggy boots. Water rolls off and dries in seconds
HYDROKOTE water repellent is featured on all Dryshod footwear products. The textile cover on the entire bootie is treated with a nano-scale hydrophobic coating that repels water and mud on contact. This keeps the textile exterior surface of the boot from icing up in freezing temps and from retaining water in the fibers in wet conditions. With HYDROKOTE, soggy boots are a thing of the past.

4-WAY STRETCH BREATHABLE AIRMESH LINING - Moves the air to keep your feet dry and comfortable
All Dryshod footwear is lined with our exclusive breathable airmesh lining to keep your feet dry and comfortable. Structured-airmesh has a top layer and a bottom layer that is held apart by thousands of tiny vertical fibers. As you walk, air is pushed and circulated through the vertical fibers allowing the skin to breath thus keeping the boot dry and humidity-free within the boot’s specified comfort range. Dryshod footwear linings are nonabrasive and hypoallergenic. When you see the orange 4-way stretch lining, you know it’s breathable airmesh - NOW YOUR FEET CAN BREATHE!

EASY-ON/EASY-OFF - 4-way stretch materials and generous heel kick for easy-on/easy-off convenience

ROLL-DOWN CALF PIPE - Roll down the top to tuck in your pant leg or vent in warm temperatures
Soft, not stiff upper! The upper calf and topline areas are made of soft, flexible DENSOPRENE foam and 4-way stretch lining that will “stretch-fit” to virtually any calf. With the flexible upper, the pant leg can be worn over or inside the boot. In the event of heat and moisture build-up, the top collar on Dryshod Boots can be folded down to vent the boot.

GENUINE NATURAL-RUBBER OVERLAYS - Only genuine hand-laid rubber. No PVC, PU, or TPR
Genuine natural-rubber overlays also serve as a protective skin for Dryshod footwear. The rubber will stay flexible for years and will not cold-crack like footwear made of PVC, Urethane and TPR materials. Dryshod overlays are also double-reinforced in the toe area and triple-reinforced in the heel area. Dryshod outsoles are made of premium natural-rubber for long wear and optimum traction.

SUPERIOR STABILITY - Reinforced tuck board with rigid shanks for added stability

SUPERIOR FIT AND COMFORT - Slipper-soft comfort and sized to athletic-shoe standards

CONVENIENT BACK-PULL TABS - Sturdy pull tabs for easy-on/easy-off convenience.

premium features

Designed and built to be 100% waterproof from top to bottom.
Keeps out the cold & wet. Keeps in the warm & dry.
No more soggy boots. Water rolls off and dries in seconds.
Moves the air to keep your feet dry and comfortable.
4-way stretch materials and generous heel kick for easy-on/easy-off convenience.
Roll down the top to tuck in your pant leg or vent in warm temperatures.
Only genuine hand-laid rubber. No PVC, PU, or TPR.
Reinforced tuck board with rigid shanks for added stability.
Slipper-soft comfort and sized to athletic-shoe standards.
Sturdy pull tabs for easy-on/easy-off convenience.

Breathable 4-Way Stretch Airmesh Lining - standard on all models

- Provides superior comfort and breathability by wicking away humidity and perspiration
- Made up of thousands of tiny vertical fibers that allow the air to circulate throughout the interior lining surfaces - airmesh allows feet to breathe!
- As you walk, air is pushed and circulated through the vertical fibers allowing the skin to breathe - keeps the boot dry and humidity free
- Nonabrasive and hypoallergenic

Orange Lining = Airmesh

WIXIT Cool-Clad™ Airmesh Lining - bonus

- Features micro-dot perforations
- Wicks moisture away - allows the air to flow more than our traditional airmesh lining
- Keeps feet cooler in warmer temperatures

Grey Lining = WIXIT Cool-Clad Airmesh

5 mm DENSOPRENE® Foam Insulated Bootie - standard*

**5 mm standard on all models except those with Cool-Clad lining*

- Keeps out the cold and wet – keeps in the warm and the dry!
- Self insulating and waterproof and acts as a neutral medium between inside/outside temperatures
- Flexible 4-way stretch is naturally lightweight, buoyant and very comfortable
- Material keeps foot and lower leg warm and protected

Polar Fleece Lining - bonus

- 6 layers of protection + EVA cold-blocking midsole = 7 layers
- Warmest boots in the Dryshod product line with a comfort rating to -50°F
- Extra 2.5 mm of densoprene on entire foot area provides extra warmth
- Additional 2 mm of polar fleece lining

HYDROKOTE® Water-Repellent - standard on all models

- No more soggy boots! Textile is treated with a nano-scale hydrophobic coating that repels water and mud on contact
- Water rolls off the nylon outer and dries in seconds and keeps the exterior textile from icing up and from retaining water in the fibers

ChemFlex Rubber - bonus

- ChemFlex chemical-resistant rubber withstands just about anything you can step in, pour on or splash through in the barnyard environment

Slip Resistant Tread - bonus

- Hard-rubber sole designs that are highly slip resistant on hard surfaces

Adjustable Gusset Styles - bonus

- Customize to fit larger calves for optimum comfort and protection with our expandable gusset and adjustable locking strap. Extra room also accommodates layers of clothing being tucked into the boot.

Dryshod is the world's most wearable rubber boot.

Dryshod makes an entire line of rubber boots that not only keep your feet clean and dry, but also offer dramatically improved support, stability and comfort. With Dryshod, you get *utility with wearability*.

Wearability means a better fit and a more comfortable wearing experience

Flexible, state-of-the-art materials allow for athletic-shoe sizing for a fit you just can't find in any other rubber boot.

Wearability means superior warmth when it's cold without added bulk

Exclusive Densoprene neoprene is a drysuit material known for lightweight maneuverability and insulation without bulk.

Wearability means 100% waterproof top to bottom and no soggy, heavy neoprene

Hydrokote water repellent coating eliminates soaked or iced-up neoprene and rotting due to farm chemicals.

Wearability means the right sole for the job

Natural rubber outsoles in a variety of sole configurations ensure long wear and exceptional traction.

Wearability means solid cushioning for joint-saving comfort

Padded lining coupled with a padded removable insole provide double cushioning. Remove the premium, high-impact insole from a Dryshod boot and feel the inside of the boot. You'll feel a padded base upon which the padded insole rides. This double padding makes for a much more comfortable boot-wearing experience that also goes a long way to protecting all of your joints and lower back from impact stress.

Wearability means boot removal that's easier than ever before

RollDown design makes removal easier than ever, allows for venting. The Densoprene uppers on a Dryshod boot are so flexible that you can literally roll them down to make boot removal much, much easier and cleaner, too. This RollDown design also allows you to tuck in your pant legs or to vent the boots. An oversized heel kick adds to the ease of removing a Dryshod rubber boot.

ViperStop Snake Hunting Boot With Gusset

Snake-protection and adjustable gusset provide all day comfort while hunting.

men's model

- Hand-laid penetration-resistant rubber from top to bottom
- WIXIT Cool-Clad™ wicking airmesh lining with added micro-dot perforations. Wicks away moisture and allows the air to flow more than traditional airmesh. Keeps the foot cooler in warmer temperatures. Less scent helps you stay undetected by snakes.
- 2" taller than our other models for extra protection from the elements, brush and debris
- **Adjustable Gusset Style** - customize to fit larger calves for optimum comfort and protection with our expandable gusset and adjustable locking strap. Extra room also accommodates layers of clothing being tucked into the boot.
- DS1 molded outsole for grip on rugged terrain
- Removable molded EVA sockliner
- Double achilles heel and instep reinforcement for comfort and protection
- Genuine VEIL® camouflage print
- Nylon shank

ViperStop Snake BootVPS-MH-CMCamoM7-16

When it comes to living in an environment that contains snakes – why take chances with a possible snake strike? Dryshod Footwear believes in the testing and product development used in producing our ViperStop and Destroyer products. Our boots are manufactured with penetration resistant rubber that gives the lower leg at minimum 16" of coverage. To ensure our products are worthy of being in the dangerous environment of snakes – we contract a third party to test our Viperstop and Destroyer. This third-party inspection includes inserting inflated latex balloons into the shaft of the product. This is followed by three to six strikes by a Western Diamondback Rattlesnake ranging from three and five feet in length. This test easily identifies if the strikes are penetrating the protective rubber. Be assured that our boots are made with high end, top grade materials to withstand the dangerous environments of snake country. Although Dryshod thoroughly tests the penetration resistance of our ViperStop and Destroyer rubber boots, snake country is a very unpredictable place. In order to ensure your personal safety, you should use extreme caution when in an environment containing snakes and do what is possible to avoid confrontations with snakes.

Dryshod Footwear makes no claims that the ViperStop or Destroyer boots are impenetrable by all snake bites. Serious risks are always present in snake country. No snake boot is 100% snake proof. This product is not to be interpreted as "snake proof" or that no injury to a user of the item is possible. In wearing the Dryshod Viperstop, you are assuming all risks arising from being in environments that contain venomous snakes. This includes all risks of injury or death from a bite while wearing ViperStop or Destroyer, and Dryshod will have no liability with respect to such injury.

Destroyer Protective Brush Boot With Gusset

Provides unmatched protection from brush, brambles and snakes. Adjustable gusset for extra comfort. Designed to easily power through the thickest ground cover and toughest terrain.
