METEOR

At Dog Gone Smart Pet Products, our focus is on developing high quality products and solutions for the pet industry. Chris Onthank, a canine expert and animal behaviorist, founded the company in 2006 with the desire to provide the pet industry with innovative and technically superior products that help alleviate the stress associated with pet parenting.

The company is committed to finding clever and creative solutions to pet owners' most common challenges: keeping the house clean and odor free, bathing, grooming, dog-walking, and helping pets stay warm and dry. The ultimate joy for D.G.S is solving a pet owner's most common problems by applying smart and cutting-edge technologies and designs to our products.

COMMITTED TO QUALITY AND SERVICE

25 years ago, Chris started the Dog Gone Smart Canine Center, where he built one of the best state-of-the-art training, daycare, boarding, and grooming facilities in New England. Today, the D.G.S Pet Product company is situated right upstairs from this 11,000 square-foot facility. It is because of this arrangement that every product can be tested and developed "in the field" before it enters the market. This ensures that every product works and exceeds the quality and aesthetic demands of modern pet ownership.

The D.G.S team truly understands the deep relationship between pets and their parents and we have made it our mission to enhance the dog-parent experience.

INNOVATIVE SOLUTIONS

Chris started the company's innovative path by introducing Repelz-It™ nano technology to the pet industry. This award-winning stay-clean technology, helps repel water, dirt, mud, stains, coat oils, and odors from sticking to fabric.

Following the initial introduction of Repelz-It™, the company expanded its product offerings to include dog bedding and outerwear; The Original Dirty Dog Doormat product lines; the innovative dog-walking modular system, I'm Gismo; and recently the waterproof light-up collar buckle...the Comet. We have incorporated into our products the following technologies and solutions:

- **Wicking technology**
- **Nano technology**
- **Reflective technology**
- **Dog-Walking Modular System**

Dog Gone Smart Pet Products are found in over forty countries around the world. To learn more about Dog Gone Smart Pet Products and the team's latest innovations, go to <http://www.dgspet.com> or write us at info@doggonesmartbed.com.

Thanks for your support!

DGS[®] PET BEDS

DOG GONE SMART[®] BEDS

are designed to meet the needs of pets and their owners. Our newest Repelz-It[™] Chenille Collection beds feature hand-sewn, upholstery-grade fabrics in a modern color palette inspired by recent home trends and designed to complement any home décor.

The outside of our DGS beds feature our patented Repelz-It Nano Protection that renders them virtually water-, smell-, and bacteria- resistant, so you can spend less time cleaning. Inside, our beds use high-density, AAA-grade, siliconized polyfill inside chambered liners to maintain a high loft and eliminate fill bunching for maximum pet comfort.

DAVE is resting on our classic blue chenille lounge bed.

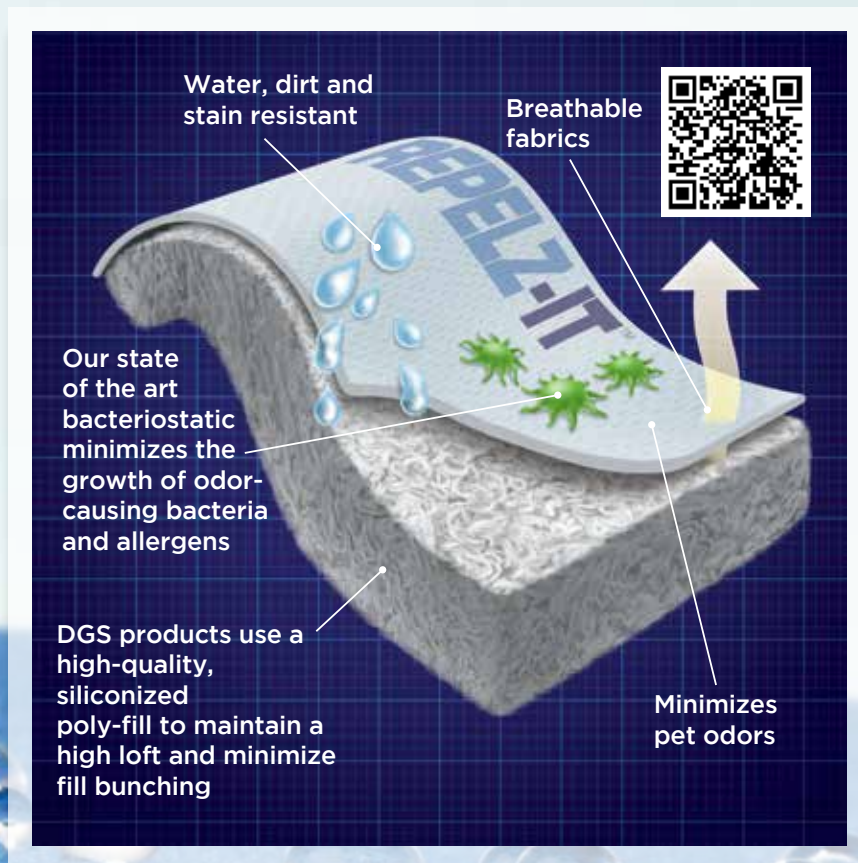

OUR TIMELESS BED DESIGNS FEATURE:

- Repelz-It protection for convenience and durability
- Chambered, high-density filling for comfort
- Hand-sewn, upholstery-grade fabric

REPELZ-IT™ NANO PROTECTION

DOG GONE SMART® is the industry leader in applying the most advanced technologies to solve many of the common pet problems we face today.

Our patented core technology, Repelz-It™, works to eliminate pet messes and odors in two ways: by preventing sticking and by inhibiting bacteria growth.

NON-STICK FINISH

Repelz-It Nano Protection is embedded deep into the fabric, making the surface water and stain resistant. Dirt and other “sticky” messes just slide right off, making cleaning a quick job. And, Dog Gone Smart products using Repelz-It Nano Protection can remain functional up to 50 washing cycles, which can mean several years of use.

ODOR CONTROL

The most common pet odor is not produced by the animal but by the bacteria that attacks the natural oil in the animal’s coat. When this oil is transferred to a bed or jacket, the fabric itself acts as breeding ground for bacteria. Repelz-It Nano Protection contains a bacteriostatic that reduces the growth and spread of odor causing bacteria. Less bacteria, less odor.

PET-SAFE

No amount of protection is worth it if it’s not safe. Perfluorooctanoic acid (PFOA) and perfluorooctane sulphonate (PFOS) are suspected carcinogens found in other stay-clean fabric finishes. Repelz-It Nano Protection is PFOA and PFOS free. Our products are non-toxic, pet- and people-safe, and environmentally friendly.

D.GS is proud to introduce:

METEOR

REFLECTIVE TECHNOLOGY

Utilizing thousands of highly reflective microscopic beads, the Meteor jacket has a glowing effect at night. When a light beam hits reflective material, the light bounces back to the source. The light bounces off the tiny beads and reflects back like a mirror. It is called a **Retroreflection**. It will help keep dogs safe during night walks.

REFLECTIVE
TECHNOLOGY

SAFE NIGHT WALKS • GLOW EFFECT • RETROREFLECTION

Bayley had fun on her evening walk while she sported the new reflective Meteor Tamarack Jacket.

METEOR

Nanoslim

Contoured elastic tail guarantees a great fit

Enhanced elastic bands around the neck and chest to ensure a better fit

Long neck with head and neck toggle strings

Soft breathable mesh for comfort

REFLECTIVE TECHNOLOGY

METEOR NANOSLIM TEMPERATURE GUIDE
