THE ART OF TOOL MAKING

PRECISION FARRIER TOOLS®

In 1946, George Earnest set up a small shop in Klamath Falls, Oregon, to fill requests for custom-made horseshoeing tools. One farrier told another about nippers that cut better and lasted longer, and the enterprise grew.

The business has changed ownership and location several times since, but the tools that are named for George Earnest still make the shoer's work easier and hold up better under hard use than all the rest.

Our pledge to our customers is to continue this tradition of excellence, combining the craftsmanship of skilled hands with modern methods and machinery, to produce superior tools.

Introducing the **EZ Pull™**

Pat.
Pend.

The uniquely designed blades slide between the shoe and hoof with just a squeeze.

No need to "wiggle" the tool under the shoe.

Saves you, the farrier, valuable time and energy.

Also excellent for removing glued-on shoes.

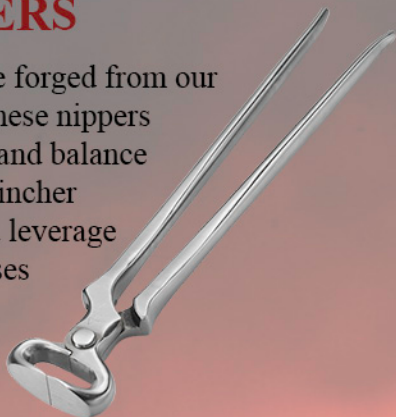

Available in 12 and 14 inch

Precision Farrier Tools

EASY NIPPERS

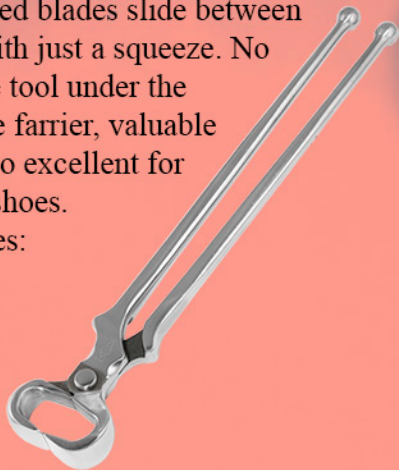

G.E. EZ Nippers are forged from our special alloy steel. These nippers combine the comfort and balance of our Curved Jaw Clincher handle with increased leverage resulting in more horses with less effort.

EZ PULL OFFS

The uniquely designed blades slide between the shoe and hoof with just a squeeze. No need to “wiggle” the tool under the shoe. Saves you, the farrier, valuable time and energy. Also excellent for removing glued-on shoes.

Available in two sizes:
12 and 15 inch.

CREASE NAIL PULLER

G.E. Crease Nail Pullers are forged from our special alloy steel. The jaws unique design lifts the nail head along its taper from a creased, swedged or fullered shoe.

HALF-ROUND NIPPER

G.E. Half-Round Nippers

start from forged special alloy steel and are precision machined to obtain the correct bevel of the cutting edge.

Designed originally for clip placement, the tool is excellent for reaching those hard-to-get-at places in the hoof.

CLINCHERS

CURVED JAW

G.E. clinchers are perfectly balanced for a comfortable grip and better control.

Ideal for clinching #5 or larger sized nails. They are heat treated to hold their bite longer under heavy use.

LOW NAIL CURVED JAW

Ideal for clinching #5 or smaller sized nails. It is also a racehorse platers dream for clinching race nails

THE ART OF TOOL MAKING

G.E. HOOF NIPPERS

Our Hoof Nippers are available in either our **Easy** or **Classic** designs. The blades are aligned and sharpened by hand for accurate trimming and longer blade life. Available in four sizes: 15", 14", 14" Race Track and 12". G.E. farrier tools are designed to be used by professionals, day-in and day-out, with maximum precision and minimum fatigue.

The 15" Nipper is our most popular all-around nipper. Professional farriers consider the 15" Nipper their most useful tool.

The 14" Nipper is considered the workhorse of the nippers. It is especially useful when working on hard hooves. Designed to be used on all breeds of horses.

The Race Track Nipper head is smaller in design with a finer cutting edge than the regular 14" Nipper. Farriers working on running and performance horses find this nipper works best.

The 12" Nipper is the smallest of the nippers and is ideal for foals and smaller hoofed horses.
