

IFA 4PLUS

L A W N C A R E

The best annual lawn fertilizer program in the Intermountain West. Our locally-formulated fertilizers and plus products grow beautiful lawns by building the healthiest, deepest green turf in four seasonal applications.

1 CRABGRASS PREVENTER + LAWN FOOD • 23-3-8

Water lawn thoroughly soon after applying

- Prevents crabgrass, spurge & other weeds before they germinate
- Effective against 30 of the most common grassy & broadleaf weeds
- Long-residual preemergent stops weeds for up to 4 months
- Provides a dark green lawn in early spring

APPLY: FEB | MAR | APR

2 WEED & FEED 24-3-6

Apply to a wet lawn so the granules adhere to weed leaves, let sit for 1-2 days, then water lawn thoroughly

- Builds thick, emerald-green turf your neighbors will envy
- Kills up to 60 common broadleaf weeds down to the roots
- Promotes strong, deep roots & healthy turf
- Added iron produces more energy for growth & dark-green color

APPLY: APR | MAY

3 SPRING & SUMMER LAWN FOOD • 25-5-10

Water lawn thoroughly soon after applying

- Safe to apply in summer heat with thorough watering
- 30% slow-release nitrogen feeds your lawn for up to 2 months
- Key macro- and micro-nutrients optimize water use and absorption
- Each pellet is coated with IFA exclusive Omniscote with micronutrients

APPLY: JUN | JUL | AUG

4 FALL & WINTER LAWN FOOD • 22-2-12

Water lawn thoroughly soon after applying

- Builds strong, deep roots for healthy, winter-ready turf
- Helps your lawn store energy for early spring green-up
- Quick, medium & slow release iron support chlorophyll development
- Specialized IFA Omniscote process evenly distributes micronutrients

APPLY: SEP | OCT | NOV

HELPING TO GROW THE THINGS YOU LOVE

OMNICOTE TECHNOLOGY

IFA's proprietary Omnicote process evenly coats each fertilizer pellet with a blend of essential micronutrients to ensure uniform distribution and application. Three types of iron—quick, medium and slow release—give your lawn a superior dark green color for a longer period of time. Our specialized coating on IFA Spring & Summer Lawn Food also contains manganese, zinc and sulfur to help optimize water use and absorption.

PLUS PRODUCTS

2 WEED & FEED + BONIDE INSECT & GRUB CONTROL

- Fast acting & long lasting insect & grub control
- Prevents summer grub damage by killing grub larva immediately after they hatch
- Kills insects in 24 hours & provides soil and surface protection for up to 3 months

APPLY: APR or MAY

3 SPRING & SUMMER LAWN FOOD + REVIVE SOIL TREATMENT OR AQUA-DRIVE SOIL TREATMENT

- Revive & Aqua-Drive improve water absorption, conserve water during times of severe heat, eliminate dry-spots during the hottest summer months, & help loosen hard, compacted soil
- Safely apply either alongside IFA Spring & Summer Lawn Food

APPLY: JUN, JUL or AUG

1 CRABGRASS PREVENTER + LAWN FOOD & 4 FALL & WINTER LAWN FOOD + BOUNTIFUL EARTH HUMATE

- Helps grow dark-green lawns that stay greener longer
- Naturally boosts effectiveness of lawn or garden fertilizer
- Humins + humic acids increase soil's ability to hold water
- Improves over-all soil structure, especially for clay soils
- Stimulates naturally-occurring soil microbes

APPLY TWICE ANNUALLY: FEB, MAR or APR & SEP, OCT or NOV
