

Futurity Precise® Premium Hoof & Health Block

Product number: 58627

Product Information

FUTURITY PRECISE Premium Hoof & Health Block is a high quality mineral and vitamin supplement block scientifically formulated to promote the well-being of your horses through proper nutrition. Added BIOPLEX trace minerals and biotin help to enhance equine diets that may be lacking in key nutrients. Research has shown that organic trace minerals and biotin help contribute to hoof integrity and animal health.

- Premium, self-fed, mineral and vitamin supplement designed to promote health and well-being through proper nutrition
- Ideal for breeding, growing and performance horses of all ages
- Also ideal for stressed and injured horses needing added nutrition to return to normal
- High quality nutritional package, including BIOPLEX organic minerals for improved bioavailability
- Added biotin and organic zinc to support strong, healthy hoof growth
- Added thiamine to aid optimal energy metabolism
- Highly palatable formula is designed to keep horses coming back for more
- Conveniently sized 25-lb blocks can be easily placed in stalls, paddocks or pastures
- Ideal for horses on green pasture and compliments most equine feeds

NET WEIGHT: 25lbs.

BIOPLEX® is a registered trademark of Alltech

Feeding Instructions

CAUTION: USE AS DIRECTED. Consumption of selenium should not exceed 3 mg per head daily.

WARNING: This product, which contains added copper, should not be fed to sheep or any species with a low tolerance to supplemental copper.

Introductory Period: During the first week of use, place the blocks 50 to 75 feet from loafing, feeding and watering areas. As horses become acclimated, some re-positioning may be necessary to achieve desired intake. If over consumption occurs for more than two weeks and re-positioning of blocks does not correct the situation, remove blocks and evaluate the overall feeding program. **DO NOT ALLOW STARVED EQUINES FREE ACCESS TO THIS BLOCK.**

Feeding Recommendations:

Provide 1 block per 5 horses. All horses should have equal access to blocks.

1. Place blocks where horses congregate. Locate blocks near loafing, grazing, feeding and watering areas. Adequate distance must be maintained between blocks to minimize crowding – 10 feet minimum.
2. Do not allow horses to run out of blocks. When a block is two-thirds consumed, provide a new block near it. Place very small pieces in a feed trough to be cleaned up.
3. Adult horses should consume an average of 4 to 5.5 ounces per head daily.
4. Provide as the only source of supplemental salt, minerals and vitamins. Provide a source of clean, fresh water at all times.

Nutrition Information

Calcium, Min	10.00%
Calcium, Max	12.00%
Phosphorus, Min	8.00%
Salt, Min	15.00%
Salt, Max	18.00%
Cobalt, Min	28 ppm
Copper, Min	800 ppm
